Subject: Canadian Radium & Uranium Site - CHP ID/IQ Support - NAREL Data
Attachments: 191206_Canadian Radium & Uranium_CHP Support Cost Estimate.pdf

Dan,
Per your request, START V has procured the services of a Weston Certified Health Physicist (CHP) in support of the Removal Assessment being conducted at the Canadian Radium & Uranium Site under TD No. TO-0032-0030. The CHP support is being brought in to validate the radiological parameter analytical results for the soil and rinsate blank samples collected in September 2019 which were submitted to the EPA NAREL laboratory. The following samples will be validated by the Weston CHP:

19 Soil Samples
2 Rinsate Blank Samples

It is estimated that 63 hours will be needed to complete the validation. The detailed cost breakdown associated with this ID/IQ request can be found in the attached document. **The total cost for the CHP ID/IQ support for the Canadian Radium & Uranium Site is \$6,645.87.**

Please concur to this email if you are in agreement. This is the first ID/IQ support requested under the START V Contract which is going to require the CO to issue a new task order. Please be advised that based on communications with the CO earlier today, it seems unlikely that the ID/IQ task order will be awarded prior to the end of December 2019. **No work associated with this request can begin until the task order is awarded and the corresponding ID/IQ TD is issued.** If you have any questions or comments please let me know.

Thanks,

Timothy Benton, CHMM
